

Les Lacs du Verger

The two lake complex of Willow and Orchard Lakes, sited a comfortable 3.5 hrs drive from Calais, offers French carp fishing at its best!

The two lake complex is located in the Champagne Region of France with easy access to the main arterial routes and the nearby town of Vitry-Le-Francois where all provisions are available.

As mature gravel pits, Orchard and Willow Lakes are clean bottomed with all areas accessible and fishable. All of the swims have been sited to give

the best access to open water and the marginal features whilst maintaining a minimal impact on the other anglers and their fishing. A great deal of effort has gone into making the environment as angler friendly as possible with good and dry access to the swims, all of which are within easy walking distance of the car parking and catering facilities.

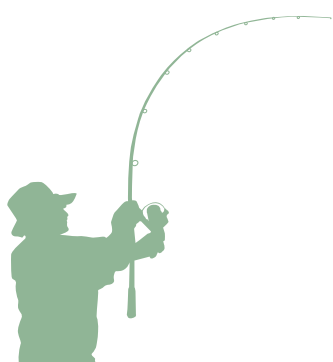

Willow Lake offers a more challenging experience with a lower stock level of fish at a much higher average weight

Les Lacs du Verger

Willow Lake, equally attractive and picturesque as Orchard Lake is just over four and a half acres in extent and comfortably accommodates the four anglers which has been set as the generous limit for this water. Adjacent to Orchard lake this water is not quite so heavily stocked and offers a more challenging experience containing around 80 carp between 25 and 55lbs (Lake record 65.5lbs October

2005) with a much higher average weight than Orchard. By way of a welcome distraction Willow also contains two large sturgeon to 61lbs+.

As with Orchard, the lake has a gravel bottom with some silty areas and many features such as gravels bars, plateaus, shallow areas and tree lined margins.

Orchard Lake offers a higher stock level of fish providing greater opportunities for a successful weeks fishing

Orchard Lake is tree lined for total privacy and since its original opening in 2003 has won the acclaim of offering one of the best opportunities for landing not only large carp but large catches too! Many have achieved their personal best time and again on this water which is estimated to hold 250+ carp between 20 and 53lbs+, grass carp between 24 and 45lbs and catfish to 105lbs+.

The lake itself in just under five acres but will comfortably accommodate five anglers offering the opportunity to move around and change swims if you are looking for a change of scenery. The lake is gravel bottomed with an average depth of six foot with marginal depths to around four foot and the lake has two islands, secluded reedy bays and some deep marginal areas. The lake has a high stock level of quality fish providing ample opportunities for a successful weeks fishing.

The Season

The season at Les Lacs du Verger commences at the end of March and finishes at the end of October. Contact us if you would like to discuss fishing outside of this period.

Prices

Latest pricing can be found on our website - alternatively please call or email us for further information.

Bait

Bait can be purchased on site eg: boillies, pellet and particles.

Equipment

If required, to lessen your load, bivies, bed chairs and bait boats are available for hire. All swims are supplied with weight slings, un-hooking mats and water buckets free of charge.

Reservation & Availability

Enquiries to establish availability must be made by email or by telephone and we will register provisional booking in this way. A confirmation of the booking will only be made upon receipt of the non-refundable deposit which is required within seven working days. Payment is by BACS transfer or Cheques. We are unable to process credit card transactions.

A booking reference will be provided at the time of your provisional booking.

All proposed guests must be registered on the booking form at the time of booking. Only those appearing on this form will be accepted on site and any changes of individuals within the party must be notified to Northgrove Fisheries prior to arrival.
